

IMPULSE TOOLS POKAYOKE

**Dimensions**

YTC-3 Poka Yoke+ controller with:
RRI-70RG

Target torques:

M8, 28 Nm

In use by:

Manufacturer of bicycles, located in Germany

Advantages for this customer:

After having worked with continuous drive tools for many years, increased sales of the bikes made it necessary to increase the productivity.

The impulse technology offers 2.000 RPM, against 400 RPM of the continuous drive tools.

YTC-3 controllers offer superior clamp-forces and very stable final-torque results, independent of the material of the product.

Conclusions:

High accuracy of final torque
Fast assembly
Lightweight tools

Tightening applications on:

Assembly of stander on bicycle frame.
