

Red Rooster Straight Grinder

NEW!

RRI-34100

The high speed RRI-34100 die grinder is specifically destined for grinding and de-burring with hard-metal burrs on a 3mm shaft. The good torque and power ratio of the gear motor transmit a stable speed of the shaft, even under loads. Use for moulds and dies but also for non-metallic materials.

Characteristics:

- Low noise-level by means of integrated exhaust-air hose with muffler.
- Turn-switch for flexibility in handling of the tool.
- Highly accurate roundness of the running shaft ensures long lifetime and low vibration levels.
- This grinder can be used with oil-free air.
